A.I.A. Division 16

 Some luminaires use fluorescent or high intensity discharge (HID) lamps that contain small amounts of mercury. Such lamps are labeled "Contains Mercury" and/or with the symbol "Hg." Lamps that contain mercury must be disposed of in accordance with local requirements. Information regarding lamp recycling and disposal can be found at www.lamprecycle.org.

The system includes:

- Onboard daylight and occupancy sensors or a combination of both
- Two extruded aluminum housing profiles with molded electrical connections
- Four types of direct shielding including a unique linear louver for AV spaces
- T8 or T5 fluorescent lamps in 1, 2 and 3 light cross section
- Specifiable high efficiency low energy lamp and ballast combinations
- Point source modules for accent lighting with MR16, T4 & BT-5 lamps
- Interchangeable power trays and corners to create and change patterns
- Up to 94% efficient
