

### How to order a **Lytespan Track System** (for Alcyon, Sof-Tech, PowerWash, and Lyteflood)

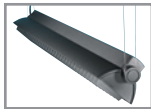

**Step 1:** Select a track fixture based on style, desired lamp and finish options.

**Example A:**

**Item#** 22MC6WH  
**Style** Alcyon Mini-Cylinder  
**Lamp** MR16 50W Max  
**Finish** Matte White

**Example B:**

**Item#** 9280AL  
**Style** PowerWash Cable Suspended  
**Lamp** 1 x 24W T5HO  
**Finish** Aluminum

**Step 2:** Select a track system based on number of circuits, profile and finish option.

Lytespan Radius and Basic Track are single-circuit systems. Lytespan Advent Track is a two-circuit system. A two-circuit system may be desirable if, for example, accent and wall-washing luminaires are mounted on the same track system but need to be individually switched.

**Step 3:** Select the necessary track connectors and accessories based on the desired pattern and mounting configuration.

Please refer to the appropriate specification sheet for each of the three types of Lytespan Track for complete details of all available connectors and accessories and instructions on their proper use.

### How to order a **Metallics or Par-Tech Track System** (for Metallics and Par-Tech)

**Step 1:** Select a track adapter based on style, desired lamp and finish options.

**Example A:**

**Adapter#** 8701TM  
**Style** Metallics Halogen Adapter  
**Lamp** PAR20, PAR30 or PAR38 Halogen  
**Finish** Dark Titanium

**Example B:**

**Adapter#** 8201WH  
**Style** Par-Tech Low Profile Adapter  
**Lamp** PAR16, PAR20, PAR30 or PAR38 Halogen  
**Finish** Matte White

**Step 2:** Select an optional twist-on shade based on lamp size and finish.

**Example A:**

**Shade#** 8737NM (shown attached to 8701TM adapter)  
**Lamp** PAR30  
**Finish** Natural Metal

**Example B:**

**Shade#** 8237WH (shown attached to 8201WH adapter)  
**Lamp** PAR30  
**Finish** Matte White

**Step 3:** Select a track system based on number of circuits, profile and finish option.

Lytespan Radius and Basic Track are single-circuit systems. Lytespan Advent Track is a two-circuit system. A two-circuit system may be desirable if, for example, accent and wall-washing luminaires are mounted on the same track system but need to be individually switched.

**Step 4:** Select the necessary track connectors and accessories based on the desired pattern and mounting configuration.

Please refer to the appropriate specification sheet for each of the three types of Lytespan Track for complete details of all available connectors and accessories and instructions on their proper use.

### How to order a **PowerArc Modular Track System** (for PowerArc Modular)

**Step 1:** Select a Lytespot or Wall Washer based on desired lamp and finish.

**Example A:**

**Item#** 8314WH  
**Lamp** T4 Ceramic Metal Halide  
**Finish** Matte White

**Example B:**

**Item#** 83W6AL  
**Lamp** T6 Ceramic Metal Halide  
**Finish** Aluminum

**Step 2:** Select a corresponding Reflector based on lamp type and desired beam spread. (Step 2 not required for PowerArc Modular Wall Washers.)

**Example:**

**Reflector#** MHT4RS  
**Lamp** T6  
**Beam** 10° Spot

**Step 3:** Select a corresponding Ballast Module based on desired lamp wattage and finish.

**Example:**

**Ballast** 83B20EAL  
**Lamp** 20 Watt  
**Finish** Aluminum

**Step 4:** Select a track system based on number of circuits, profile and finish option.

Lytespan Radius and Basic Track are single-circuit systems. Lytespan Advent Track is a two-circuit system. A two-circuit system may be desirable if, for example, accent and wall-washing luminaires are mounted on the same track system but need to be individually switched.

**Step 5:** Select the necessary track connectors and accessories based on the desired pattern and mounting configuration.

Please refer to the appropriate specification sheet for each of the three types of Lytespan Track for complete details of all available connectors and accessories and instructions on their proper use.

### How to order a **Lytejacks Track System** (for Lytejacks)

**Step 1:** Select a Lytejack Spotlight based on style and finish options.

**Example:**

**Item#** 8672WH  
**Style** GeoStar  
**Finish** Matte White

**Step 2:** Select a Power Jack transformer based on desired mounting configuration.

Lytejacks can be track mounted by using an 8600 Track Power Jack or mounted to a ceiling surface by using an 8601 Surface Power Jack.

**Step 3:** Select an optional Extender Stem.

Lytejack Spotlights come with a built-in 3" stem. Optional stems in various lengths are available to extend the spotlight further away from the track or ceiling surface.

**Step 4:** Select a track system based on number of circuits, profile and finish option.

Lytespan Radius and Basic Track are single-circuit systems. Lytespan Advent Track is a two-circuit system. A two-circuit system may be desirable if, for example, accent and wall-washing luminaires are mounted on the same track system but need to be individually switched.

**Step 5:** Select the necessary track connectors and accessories based on the desired pattern and mounting configuration.

Please refer to the appropriate specification sheet for each of the three types of Lytespan Track for complete details of all available connectors and accessories and instructions on their proper use.
