TECHZONE™ Ceiling System – Pendant Fixtures

LIGHTOLIER®

Armstrong® TechZone™ Compatible

Indirect Pendant Fixtures

F7000 Series Louvers

The F7000 lighting system is a remarkably powerful tool for creative lighting. The elegantly slim F7000 modules provide generous and effective indirect lighting with a wide choice of light distributions and luminous textures. Ambient fluorescent lighting elements can be suspended individually, arrayed in linear runs, configured in patterns, and even spaced variably apart on in-line connectors of different lengths. Point source modules with adjustable accent lights can be integrated into any run or pattern or used independently.

The F7000 includes seven series of fluorescent modules, each specifiable in different lighting distributions and luminous textures. Each is pleasing enough to be used as a single fixture, yet disciplined enough to arrange in quantity. F7000 is carefully scaled for today's interior spaces and articulated to float ethereally above partitions, desks and tables or displays. Lamp options: 2 T5 28- or 54-watt versions.

F7000 Series Louver Pendant

Agili-T Neo Flat Blade or Parabolic Louver

A unique 37 cell central parabolic louver of the Lightolier Agili-T AGC provides an affordable, elegant design accent featuring high-efficiency, low glare direct/indirect illumination. The luminaire's slender shape adds a modern touch to most interiors. The Agili-T NEO AGB features a unique 46 cell central flat blade louver design with a high reflectance matte white finish. This Neo offers highly affordable glare control in an elegant package. Lamp options: 1 or 2 T5 28- or 54-watt versions.

Agili-T Network luminaires combined with Lightolier iGEN capabilities and strategies provide the ultimate in addressable lighting control solutions. Every luminaire, features integrated continuous communication wiring and a choice of proven, sensor-compatible intelligent ballast technologies providing integrated occupancy and daylight sensing possibilities in every Agili-T luminaire. This provides the most energy efficient architectural solution for your Armstrong Tech Zone applications.

Agili-T Neo Indirect

Sleek, soft contoured fixture provides aesthetically pleasing indirect light that blends well into most environments. Versions using powerful 54-watt T5HO lamps are ideal for high-lumen indirect applications requiring ultra wide, even distribution and wide luminaire spacing. The super lightweight extruded aluminum housing is available in low-maintenance white or titanium textured finishes. All Agili-T Neo fixtures have a choice of two easy leveling, suspension systems for improved installation performance. Up to three sensors can be integrated anywhere along the special SensorLyte sensor channel with available motion, daylight, or infrared sensors. Special joining device integrates mechanical, electrical (2 circuits) and communications connections. Lamp Options: 1 or 2 T5 28- or 54-watt versions.

Agili-T Neo Indirect Pendant

Lightolier Agili-T - New Forms of Intelligence

Building owners, architects, lighting designers and their clients now have more intelligent lighting options than ever, in order to achieve...

Low Energy Lighting - Performance-driven, cost-effective luminaires and lighting control capabilities.

Quality Lighting - People-oriented, productivity-enhancing lighting opportunities.

Sustainable Lighting Design - Planet-friendly, green lighting alternatives that complement LEED™ (Leadership in Energy and Environmental Design) buildings.

With Agili-T, Lightolier has developed the ultimate architectural pendant featuring a wide range of styles, state-of-the-art lightweight construction and all-in-one mechanical, electrical and network connections. With Agili-T Network's integrated digital technology and Lightolier iGEN (Intelligent Generation of Lighting), Lightolier delivers the ultimate intelligent luminaire and incredibly flexible lighting control benefits, whether you are lighting a single office or an entire building. Meet your most demanding energy-efficiency targets, human resource needs and corporate responsibility objectives with Lightolier Agili-T... Another shining example of Lightolier's commitment and innovative stride to advancing lighting technology.

All Lightolier pendant fixtures are compatible with TechZone Ceiling Systems.
