

(Shown Actual Size)

Performance Package.

Mini HID track lighting is a powerful combination of high performance lighting presented in a sleek unobtrusive design and the smallest ceramic metal halide package available. Offering up to 70% energy savings vs. halogen lamps, the Mini HID can replace a 50W low voltage MR16 fixture. Approaching the size of a low voltage halogen track fixture with 3-4 times longer lamp life the Mini HID is the choice for high-performance energy smart retail lighting. Contact your Lightolier Sales Representative for detailed information on the Mini HID product offering.
